Is the final big addition in a busy year of big add-ons for Train Simulator 2015. It's bigger than the Hailsham Railway and Hailsham to London routes, but it's also packed with lots of extra scenarios to keep the immersive gameplay going! This route has it all: loads of rolling stock, busy timetables and plenty of detailing to keep you on the go. The Western Lines of Scotland route is spread out over two separate packages for added convenience. The 15 train scenarios are split into two bundles of 5 scenarios - bringing you the faster, more local options. There are scenarios featuring only one train type for added convenience, but for the most diverse train experience, the bundles contain scenarios with up to 3 different types of train. The ScotRail scenarios include additional branch line options with the Black 5 to Kirkcudbright. The Western Lines of Scotland route will ensure a busy year for train fans. I plan to steam through to Carlisle myself, in part to test the Caledonian route, but also as an excuse to visit all the stuff in Cumberland for the tour. My mate is going to run around the Western Islands between Cumbria and the Scottish Borders, similar to the way you are doing with the Western Lines of Scotland. If you want to wait a bit for us and any other passengers we have planned on waiting a bit for too, you might want to do the same thing, travelling all around Scotland (there are a number of people on this forum that have done just that). If you do, and meet any others on the way, you might want to share your steam tales. I'm sure as hell interested in meeting up with you guys. Carlisle will be my main destination for now, but I definitely want to explore the whole of Scotland, including the Western Isles. There are also loads of wee places in Cumberland that I want to see for the first time. I really enjoyed the Western Lines of Scotland route. My only real gripe is that there was no way to match
